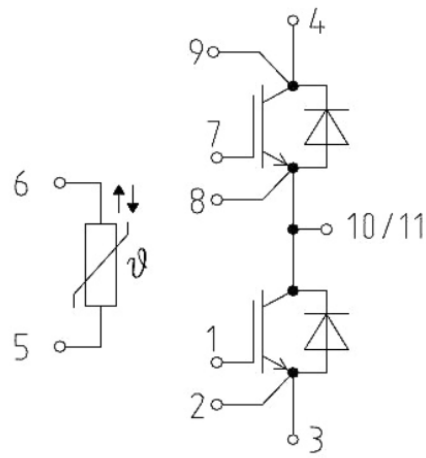
C5 series package: 1200V 450A IGBT module

Datasheet



Equivalent
Circuit Schematic

Features:

- Trenchgate Gen.7 IGBT technology
- $V_{CE(sat)}$ with positive temperature coefficient
- High RBSOA capability
- Low static losses: $V_{CE(sat)}$ = 1,5V@25℃
- Low dynamic losses

Options:

- Pre-applied TIM (option +M01)
- Adoption for parallel connection (Vf selection)

Typical Applications:

- Motor Drives
- Solar Applications
- UPS Systems
- Energy Stores

Terms and Conditions of Usage of Technicon products

The data contained in this product datasheet is exclusively intended for technically trained staff. You and your technical departments will have to evaluate the suitability of the product for the intended application and the completeness of the product data with respect to such application. This product data sheet is describing the characteristics of this product for which a warranty is granted. Any such warranty is granted exclusively pursuant to the terms and conditions of the supply agreement. Therefore, products must be tested for the respective application in advance. Application adjustments may be necessary.

The user of Technicon products is responsible for the safety of their applications embedding Technicon products and must take adequate safety measures to prevent the applications from causing physical injury, fire, or other problems if any of Technicon products become faulty. The user is responsible for ensuring that the application design is compliant with all applicable laws, regulations, norms, and standards.

Except as otherwise explicitly approved by Technicon in a written document signed by authorized representatives of Technicon, Technicon products may not be used in any applications where a failure of the product or any consequences of the use thereof can reasonably be expected to result in personal injury.
